EVOLUTION

ecosmob
makes your vision a reality

In 2012 we started working on web and mobile applications.

Commenced giving QA services in 2018. AI/ML development was next to the stage in 2018.

2007

2012

2017

2018

2020

Started in 2007 as a custom VOIP business solutions provider company.

Successful entry in SAAS in 2017 with LoyaltyXpert. The first milestone of 100 employees in 2017.

In 2020, we started Working on DevOps. Tragophone research and development started in 2020.

ecosmob
makes your vision a reality

Since our inception, we have always focused on catering to high-quality, enterprise-grade IT solutions & services to a global clientele. We believe in making your vision a reality

Mission

We offer our resource platform where customers can find innovative solutions to their requirements in an ecosystem where expert brains, cutting-edge technologies, and transparent processes thrive in a symbiotic relationship to provide best-in-class solutions. Once into a relationship, our teams continue collaborating with customers to ensure our solutions deliver excellence, making customers delight in our ongoing aspirations.

Vision

To be the most preferred technology partner, offering innovative solutions with a customer-centric approach. We design software with the vision that revolutionizes.

Values

- Integrity

Maulik Shah
Co-Founder & CEO

Mr. Maulik Shah is the Co-founder and CEO of Ecosmob Technologies Pvt Ltd. Since the inception of Ecosmob in 2007, Maulik has led the innovation and engineering in VOIP technology. Having a passion for learning new technologies, he gained front-end and back-end technology expertise. Maulik is also a Co-Founder and Director of Tragofone, a custom-built VoIP-based SIP softphone. He eventually jumped to sales and marketing and mentored the team to build out-of-the-box strategies. Moving ahead, he added another feather of innovation to his deck, venturing into a SAAS-based solution Myeducomm to cater to schools and colleges for optimal collaboration between teachers, students, and parents. In 2019, he launched LoyaltyXpert- a loyalty program solutions provider. With an academic background in IT engineering, Maulik brings a unique blend of communication and technology to an entirely new level that adheres to transparency, quality, and a client-centric approach.

makes your vision a reality

Ruchir Brahmbhatt
Co-Founder & CTO

Mr. Ruchir Brahmbhatt is the Co-founder and CTO at Ecosmob Technologies Pvt. Ltd. He is a BE IT graduate and has spent 14 years in the technology and communication industry. From starting as a VoIP engineer and becoming a highly sought technology expert in Asterisk, Freeswitch, OpenSIPs, and Kamailio, he consistently scales companies to derive growth. He contributed substantially to setting up a department of unmatched developers and accelerating their efficiency by close observation, thus providing the right tools. His team at Ecosmob has worked on versatile development projects from web development to mobile development, including front-end and back-end technologies, since 2014. From project analysis and execution to delivery, he led the team, torching them towards the right path for successful project completion. He also launched software for the educational sector - Myeducomm to enable continuous communication between teachers, students, and parents. Being passionate about IT engineering and technology enthusiasts, Ruchir has given new wings to the organization to rise higher and higher by holding transparency, quality, and client satisfaction at the center.

makes your vision a reality

Krunal Patel
VP Sales

Mr. Krunal Patel is the Vice President of Sales at Ecosmob Technologies Pvt. Ltd. With 15 years of association at Ecosmob, he stands at the forefront of the fastest-growing company as a techno-commercial and VoIP technology expert. He has spent the last six years building businesses across North America, Europe, the Middle East, and Africa by building successful business strategies and incubating business models for SMEs to enterprise-level clients. His previous roles include wearing different hats from a software engineer and technical analyst to project manager and building carrier-grade VoIP Solutions utilizing open-source VoIP Telephony Frameworks such as Asterisk, FreeSWITCH, OpenSIPS, and Kamailio. He is vocal about human-to-human selling and building long-term business relationships with the customers, thereby establishing a win-win approach.
